PROFILE

A passionate IT student with hands-on experience in developing operating systems and creating innovative tech solutions. Currently pursuing a deep understanding of algorithms, database management systems (DBMS), and web technologies. Skilled in designing and implementing complex systems, with a keen interest in AI-powered applications and creative web technology profiling tools. Actively working on projects involving algorithm design, database structures, and creating cutting-edge tools for real-world applications.

SKILLS

- Web Design
- Java,Python,C
- Mysql
- Front End Coding
- Problem-Solving
- Project Management Tools
- Strong Communication

EXPERIENCE

SMART INDIA HACKATHON

Title : Smart Traffic Management System

April 2024- August 2024

- Collaborated in the development of a Smart Traffic Management System under Smart India Hackathon (SIH) 2024.
- Worked on optimizing traffic flow and reducing congestion using real-time data and IoT-based solutions.
- Contributed to system design, data integration, and ensuring scalability for urban traffic management.

HACKINDIA

Title : Ai Habit Tracker

January 2025-march 2025

- Participated in HackIndia Spark 2, working on the AI Habit Tracker project.
- Developed AI algorithms to provide personalized habit recommendations based on user data.
- Focused on user experience design, machine learning model training, and integrating AI features into the habit tracker application.

EDUCATION

SECONDARY SCHOOL

KSV higher secondary school

2021 - 2023

BACHELOR OF TECHNOLOGY

Kongunadu college of engineering and technology

2023-2027
